

**Experience Maximum Up-time and Significant Cost Savings on the Maintenance of Your EMC Data Domain Storage Equipment with a “Flex-Storage” Maintenance Strategy from Data Vista.**

## **WHY DataVista ...**

***Data Vista is the Leader in EMC Data Domain after-warranty Storage Maintenance Services ...***

### **EXPERT SERVICE - IN STOCK SPARE PARTS - REAL TIME LOGISTIC**

***Data Vista has solved the problem of rising OEM costs of maintaining your 1st and 2nd generation EMC Data Domain storage equipment.***

**EMC Data Domain** continues to be a productive, robust storage protection solution for many clients around the globe. As the 1st and 2nd generations of Data Domain storage platforms approach the End-of-Service-Life, clients confront the reality of maintaining maximum uptime while understanding EMC support is becoming more limited... and more expensive.

This leaves many clients scrambling for a solution to meet their support needs. Data Vista has taken the lead in this category.

Data Vista Storage Experts support Data Domain product lines. Data Vista's offering includes 7x24x4 and next business day on-site support, remote call home capabilities, backline technical support from our Data Domain experts, and the right part, at the right time, when you need it.

Below is a sample list of the most commonly available EMC Data Domain models that Data Vista supports today. Monthly pricing is all-inclusive, configuration based, and includes all expansion shelves, replacement parts, and hard drives. The sample pricing is based on Data Vista's analysis of average configurations but will honor the pricing provided below. If your specific configuration is smaller than average, Data Vista can adjust price to fit your needs.

### EMC Data Domain Service Rates:

Model	Last Sale Date	End of Life	End of Service Life	Data Vista MMC
DD660	8/8/2009	12/10/2010	12/31/2015	\$197
